Logo variations

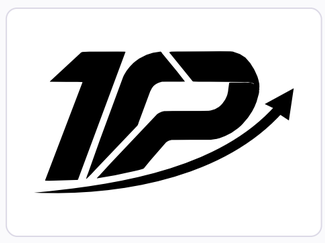

Every approved treatment in each layout, followed by the logo on four background types with a contrast check against WCAG 2.2 thresholds for graphics (3:1) and text (4.5:1).

Full colour 3D, dark	Full colour 3D, light	Flat, dark	Flat, light	One colour black	One colour white	White on violet

Mark only

On backgrounds

Light background
Worst case 18.61:1 AAA
Average 18.61:1

Dark background
Worst case 20.48:1 AAA
Average 20.48:1

Photographic background (vector stand-in)
Worst case 4.01:1 AA large
Average 15.38:1

Brand gradient background
Worst case 6.3:1 AA
Average 7.48:1

Contrast is measured between the logo's main colour (Summit White on dark, Ink on light) and the background behind the logo area. The photographic example is drawn in vector because the files may not embed raster images; with a real photo, check the area behind the logo and add a dark scrim if it falls below 4.5:1.
